PROFESSIONAL EXPERIENCE

FaoTech

Freelance | Frontend Developer

Kazan, Russia
September 2022 – Present

- Collaborated with UI/UX designers to implement visually compelling and intuitive interfaces.
- Developed fully responsive web applications compatible with all devices.
- Enhanced the user experience by incorporating various loading animations during data and image loading on webpages.
- Collaborated with Backend developers to integrate the API, ensuring accurate and relevant data presentation within the user interface.
- Proficient in implementing Create, Read, Update, and Delete (CRUD) operations integrated with Backend APIs.
- Proficient in manipulating and transforming data received from the Backend for seamless communication and integration with Backend systems.
- Implemented essential authorization functionalities, such as login, registration, and password recovery.
- Integrated email services, such as Email.js, into the system.
- Created user interface for the admin panels and implemented their full range of functionalities.
- Optimized critical content pages to align with SEO objectives, achieving a high SEO score as confirmed by Google Analytics web performance analysis.
- Implemented a multi-language functionality with support for multiple diverse languages, utilizing the i18n internationalization framework.

PROJECT COMPLETIONS

Belinsky Production

A production house and a creative studio, its areas of expertise include producing both photography and filmmaking.

Indonesia
November 2023 – January 2023

- Developed fully responsive web application compatible with all devices.
- Implemented loading animations to enhance the user experience when loading images and videos.
- Integrated email services, such as Email.js, into the system.
- Implemented form submission validation to ensure data integrity and prevent the submission of erroneous or random data.

TurunTangan

A non-profit youth volunteer movement engaged in social humanity, environment, education, political education, and health with more than 70 chapters across Indonesia.

Indonesia
February 2023 – March 2023

- Created user interface for the admin panels and implemented their full range of functionalities.
- Implemented a sleek and user-friendly pop-up modal for seamless user login and registration.
- Implemented image upload functionality for user registration and profile editing, integrated with Backend APIs.
- Developed a custom React hook, 'useDebounce', for efficient data filtering.
- Executed comprehensive CRUD operations integrated with the Backend APIs, including the management of volunteer programs within this project utilizing axios library.
- Utilized JWT Tokens for user login and password recovery functionalities.

KIMA

A digital platform for universities that enables them to monitor the relevance of their educational programs in specific fields and evaluate how well they align with the current qualification and competency requirements of the job market.

Russia
March 2023 – April 2023

- Integrated job vacancies data with a third-party API from hh.ru, recognized as one of the world's largest job and employee search platforms.
- Designed and implemented a discreet button that redirects administrators to their dedicated login page.
- Implemented the use of the browser's local storage to securely store JWT tokens for user authentication.
- Created the UI for a user profile page with integrated CRUD operations for editing personal data and managing skills sections.

Hebronstar

A leading management consulting firm and the Asia's leading advisor on business strategy based in South Korea.

*Korea
July 2023 – Agustus 2023*

- Utilized the i18n internationalization framework to enable multi-language functionality, accommodating six different languages, including Korean, Chinese, Indonesian, Malaysian, and Vietnamese.
- Incorporated a feature-rich text editor into the admin panel, complete with a custom toolbar, font options, color choices, text spacing controls, and image upload capabilities.
- Handled complex data processing for CRUD operations, refining data from the Backend APIs and seamlessly sending it back to the server for the services and industries section.
- Utilized React Query to facilitate CRUD operations with the Backend APIs.

PT. Sinergy Perdana Mandiri

A general and chemicals trading company

*Indonesia
June 2023*

- Enhanced a static Wix website by revamping animations and overall website functionality.
- Developed fully responsive web application compatible with all devices.
- Implemented email services such as Email.js for its contact us page.
- Revamped animations by utilizing the Framer Motion JavaScript library, achieving smoother transitions.

Gap Design Studio

An information technology agency that offers a wide range of services including website design, graphic design, copywriting, illustration and more.

*Kazakhstan
May 2023*

- Developed fully responsive web application compatible with all devices.
- Enhanced user experience by implementing blurhash for image loading.
- Integrated Facebook Pixel to effectively measure website audience engagement.
